

STRAIN DISCONTINUATION AND SUBSTITUTION GUIDE

Cultiva® Signature **San Fernando Rain****Overview**

San Fernando Rain is being discontinued. Remaining stock is limited and moving fast, so please place final orders before **31 August 2026 or while supplies last**.

As part of our ongoing strain review, strains are discontinued when suitable alternatives can deliver the same treatment outcomes.

To support continuity of care, the substitutes below have been selected for their overlapping terpene profiles and therapeutic effects.

	San Fernando Rain	Rainbow Pie
THC	27%	27% (+2% CBG)
Type	Hybrid	Hybrid

Alternative Recommendations
for Specific Patient Needs

While Rainbow Pie is the recommended replacement strain, some patients may benefit from an alternative product based on their individual symptoms and treatment goals.

The following strains may be considered when a more tailored therapeutic approach is required.

Condition	Substitute Strain + THC	Terpenes	Therapeutic Effects	Additional Benefits
Chronic Pain	Tangelo Boost (24% THC)	Limonene Myrcene Caryophyllene Farnesene Pinenes	Energising Uplifting Focus Enhancing Anti-inflammatory	Shares SFR's core limonene, myrcene and caryophyllene terpenes. Sativa-dominant profile supports daytime pain management while maintaining function and clarity.
Anxiety/Stress	Jealousy (24% THC)	Caryophyllene Myrcene Limonene Linalool Farnesene	Anti-anxiety Sedative Uplifting Anti-inflammatory	Calming body and mind with overlapping linalool and myrcene terpenes, closely mirroring SFR's anxiolytic profile.
Depression	Lee Ann Womac (24% THC)	Terpinolene Caryophyllene Farnesene Limonene b-Pinene	Uplifting Calming Anti-inflammatory Energising	Mood-lifting with shared limonene and caryophyllene. Functional, energising alternative suitable for any time of day.
Insomnia	Jealousy (24% THC)	Caryophyllene Myrcene Limonene Linalool Farnesene	Anti-anxiety Sedative Uplifting Anti-inflammatory	Sedative-leaning profile with caryophyllene, myrcene and linalool combination supporting sleep onset.
ADHD	Tangelo Boost (24% THC)	Limonene Myrcene Caryophyllene Farnesene Pinenes	Energising Uplifting Focus Enhancing Anti-inflammatory	Sativa-dominant, beneficial for mental alertness and focus. Tropical citrus aroma with THCVA detected, supporting daytime cognitive function.
Insomnia / Chronic Pain / Anxiety / PTSD	Blue Pavé (26% THC)	Limonene Caryophyllene Linalool Myrcene Selinene	Sedative Muscle Relaxant Analgesic Anti-inflammatory Anxiolytic	Indica-dominant with rapid-onset relaxed euphoria transitioning to pronounced sedation. Suitable where severe pain, heightened stress or sleep disturbance are clinical priorities. Shares key terpenes with SFR including limonene, caryophyllene and linalool.

STRAIN DISCONTINUATION AND SUBSTITUTION GUIDE

Cultiva® Signature San Fernando Rain

**Next Steps for
Healthcare Providers**

- Advise patients to fill any current San Fernando Rain prescriptions before 31 August 2026.
- Where appropriate, include San Fernando Rain and a recommended substitute strain in the treatment plan ahead of the discontinuation date, allowing patients to transition without significant interruption to care.
- Discuss potential alternatives with your patients and identify the best fit for their individual treatment plan.
